

AMENDMENTS TO THE SPECIFICATION

Please replace paragraph beginning on page 8, line 13 of the specification with the following amended paragraph:

The handheld device 100 includes a data processor and memory for accepting, storing, displaying, and editing entered blueprint data. A blueprint plan is entered as a sequence of line segments and/or arcs. The position of arcs and segments in the sequence may be used to determine the action taken with respect to the unedited arcs or line segments when a selected arc or line segment is edited, inserted, or deleted. In one embodiment, handheld device 100 includes a computer-readable medium, such as the above described memory, comprising computer-executable instruction (e.g., executed by the above described processor) stored therein for causing performance of procedures described herein.
